

# *Incredibly Strong, Reinforced Baths*

Trojan have developed a bath with extra strength and rigidity that is traditionally only associated with cast iron baths. The intensive reinforcement process, also known as Trojancast is available on all standard acrylic baths.\*

\*unless stated otherwise

With its 'racing green' resin jacket, not only does Trojancast make each bath incredibly hard wearing, its added thickness reduces the amount of heat loss through the side walls. Also, for added peace of mind, a Trojancast bath comes with a 30 year guarantee!
